

# TINTING

## AFTERCARE ADVISE

- Avoid sunbathing for 24hrs (Please remember sun bathing can naturally lighten and bleach the hair causing them to fade much quicker)
- Avoid heat treatments
- Avoid applying makeup for 24hrs after.
- Avoid oil based products over the tinted area as this can cause the tint to fade.
- Avoid touching the treated area.
- 

## PLEASE NOTE:

The effects from tinting start to diminish by 4-6 weeks.

If you experience any swelling or irritation then use a cold compress to help soothe the area. If you have any concerns or questions then please do not hesitate to contact us.
