

MICROBLADING SEMI-PERMANENT EYEBROWS

AFTERCARE ADVISE

- Please follow this guidance to achieve the best results for your new brows.
- Remember the colour of your brows will be 30%-50% darker immediately after your treatment. Please do not be alarmed by this as the true colour will come through once healed.
- Please view the next page. This is an image of the healing process in all the different stages. Everyone heals at different rates so please use this as a rough guide only.
- The full healing process takes upto 6weeks.
- As your brows heal they will go through a transitional stage at around week 4/5. It may appear that your microbladed brows have disappeared but please don't be alarmed this is totally normal and is where the healing layer of skin is covering the pigment. Once healed the true healed colour comes to the surface.
-

Aftercare:

Do not pick rub or scratch your brows.
(this will pull out the pigment leaving your brows patchy)

Apply a small grain of rice amount of balm over your brows twice a day for 3-4 days.
After this dry heal and do not put anything on or over your brows.

Keep hair away to prevent infection.
Do not wax your brows for 2 weeks after.
Do not apply any make up over your brows until healed.

Avoid heat treatments, saunas, steam rooms/ showers, sun beds & perfumed products.

Days 2-5

- **Tenderness**
- **Swelling/redness/feeling sore**
- **Dryness/flakeyness**
- **Itchy (Please DO NOT SCRATCH)**

Days 7-21

- **May appear patchy**
- **Transitional stage may occur (colour dissappears for short time)**

Days 21-28

The healed microbladed brows appear.

Long term aftercare :

We advise an annual top up is required to refresh your colour and keep them at their best

Use Spf to protect them from UV

Avoid acid based moisturisers over your microblade brows as this can cause them to fade.

If you have any questions or concerns then please do not hesitate to contact us.
