

# WAXING AFTERCARE

## AFTERCARE ADVISE FOR 24-48HRS POST TREATMENT

- Avoid hot showers and baths (just bathe with luke warm water)
- Avoid touching the treated area. If you do need to touch the area ensure you have clean hands.
- Keep the treated area clean.
- Avoid steam and sauna treatments
- Avoid the use of deodorant or perfumed products on the treated area
- No sunbathing.
- Wear loose fitting clothes.
- Avoid swimming in chlorinated water.
- Please refrain from shaving in between appointments.

## PLEASE NOTE:

You may notice a small amount of regrowth after a week. This is because the hair has a natural cycle and it can take upto 4 treatments before your hair cycle slows providing you longer and longer in between appointments.

You may experience sensitivity after your waxing treatment and this can last upto 48hrs. Please do not hesitate to contact me if these symptoms persist.

Here at Salon No10 we recommend to leave 4-6weeks between appointments.
